🔗 LeetCode

👤 PROFILE

MERN Stack Developer with 6 months of expertise in backend development, responsive UI design. Proficient in Node.js, React, Redux, JavaScript, Express, MongoDB, HTML, CSS, Recharts, and Material-UI. Strong problem-solving skills demonstrated by solving 200+ problems on LeetCode. Proven track record of delivering high-quality, intuitive solutions with an additional 7 months of freelance experience building custom web and eCommerce platforms.

🏆 PROFESSIONAL EXPERIENCE

Full Stack Developer Intern (Kloudrac, Noida, 6 months) — Developed web apps with React, Node.js, and Redux; managed UIs, MongoDB, and API integrations.

Freelance Full Stack Developer (Upwork, Remote, 7 months) — Built custom websites and eCommerce platforms; focused on React, Redux, Node.js, and payment integrations.

📁 PROJECT

Fully Functional E-Commerce Store(GITHUB REPO LINK) 🔗

Key Features:

- **User Interface:Authentication:** Users can register, log in, and reset passwords; includes functionality for forgot-password recovery.
- **Shopping Experience:** Users can browse products, add items to a cart, proceed to checkout, place orders, and make payments using Stripe for secure transactions.
- **Profile Management:** Users can update their profiles, including password changes and image updates.
- **Image Handling:** Utilized Cloudinary for image storage and management, ensuring efficient handling of user and product images.
- **Reviews:** Enabled users to leave reviews on products.
- **Admin Interface:User Management:** Admins have access to view and manage all users.
- **Product Management:** Admins can create, update, and delete products. Includes features to update product status (e.g., delivered, shipped).
- **Order and Review Management:** Admins can view all orders, reviews and many more features.
- **Data Visualization:** Integrated Chart.js to display visual reports on product metrics, including sales and inventory levels, providing admins with actionable insights.

Technologies Used:

- **Frontend:** React for building a responsive and dynamic user interface.
- **Backend:** Node.js for server-side logic and API development.
- **State Management:** Redux for managing application state.
- **Database:** MongoDB for storing user, product, and order data.
- **Image Storage:** Cloudinary for handling and serving images.
- **Payment Gateway:** Stripe for processing secure payments.
